### Eye Treatment Aftercare

- If possible, refrain from wearing make-up for 24 hours.
- If you normally wear contact lenses, please refrain from wearing them for 24 hours. If you wear them immediately after your treatment, there is a slight risk that some residue might remain on the lashes which could transfer to your lenses.
- Do not rub eye area as remaining residue, if any, might transfer to the eye causing an irritation.
- If an unexpected reaction occurs, consult your doctor immediately.
